

Ashes, flesh and bones

Hiding in your soul is a secret place, I know
Far beneath your consciousness and beyond, unknown
You're near, I feel
Hot, cold both in a shiver
Your skin, my grin
Your soft touch gave me fever

A fire stared burning every muscle fiber
Hold me tight and tighter
Oceans and the seas will not put out the fire
Growing higher now
Ashes, flesh and bones(x4)

Drop all of your clothes by the fire place, so slow
Loving is a plane that cannot be flown, solo
Slip in, the wind
Rain turns into a river
So drown, come down
Love is both sweet and bitter

A fire stared burning every muscle fiber
Hold me tight and tighter
Oceans and the seas will not put out the fire
Growing higher now
Ashes, flesh and bones(x4)

Slowly close your eyes, nature's lullabies
Don't leave 'cause it's cold outside there
When the sun is high, I'll be by your side
If you leave I will die

A fire stared burning every muscle fiber
Hold me tight and tighter
Oceans and the seas will not put out the fire
Growing higher now
Ashes, flesh and bones(x4)
