

UNTIL DAWN

Turn around let me take you away
Into open space where angels party
Satellites and stars, matter floats around us
My lust, your lust
My thirst your thirst

When I taste your lips we're so far from earth
I know for me you will always come first
Leaping in the air, and falling inside you
My light your light
The night so bright
Reach out for the horizon
Moving together

Until dawn
Until dawn

Here infinity's a number you count
And we're faster than the speed of sound
One and one is one, now we're fused together
My love your love
My heat your heat
My beat your beat
My joy your joy
